DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE		
<p>This 3 story, 3 bay wide brownstone town house is one of at least two which stood side by side in 1858, the date of their construction. In badly deteriorated condition, it is an example of the Renaissance revival style, rendered in a period when brownstone enjoyed a certain vogue in Baltimore.</p> <p>The first floor facade has been completely obliterated by a high wall of light-colored brick, with a cut out round arched entrance, all of recent date. The second floor windows have flat, projecting hoods supported on consoles. The rest of the framing members are too badly damaged to determine their original state, however the flat sills remain, supported on tongue-like brackets. The third floor window frames appear to have differed only in that the hoods had a central arc with flat ends. All windows are double hung with 4/4 lights. A row of dentils runs below a row of grooved brackets which support a plain cornice.</p>
